

INFECTION PREVENTION GUIDELINES: STUDENT GATHERINGS

Effective August 11, 2021

The following guidelines pertain to school sanctioned student gatherings, celebrations, and extracurricular activities. These guidelines may continue to change as the COVID-19 pandemic evolves. They are in place to mitigate infection risk, decrease the chance of exposure, and limit the need for contact tracing.

School-sanctioned events occurring on-campus or off-campus with greater than 20 attendees must complete this [FORM](#) in order to confirm that IP guidelines are met.

Gatherings of **any size** must have the following:

- Participants must attest that they:
 - Are fully vaccinated for COVID-19 and have a vaccination sticker on their ID
 - Are not symptomatic
- Participants must adhere to [Mount Sinai Health System and Icahn School of Medicine masking and distancing policies](#) while in school and in on-campus facilities
- Masks are required at all times in all indoor spaces
- Hand hygiene should be frequent and thorough
- Space must be cleaned before and after use
- Outdoor activities are preferable
- No food and drink may be served at indoor events
- Food and drink may be served at outdoor gatherings. If food or drink is served, it must be individually packaged
- Attendance (including name and contact information) must be documented so that participants can be quickly assessed for contact tracing purposes

These guidelines are in place as a reference for Medical and Graduate School administration, student leaders, student group faculty advisors and others who are involved in extracurricular programming.
